### Supplier Details

<table>
<thead>
<tr>
<th>Supplier Name:</th>
<th>Palabora Copper (Pty) Ltd</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address:</td>
<td>PO Box 65 Phalaborwa, 1390 South Africa</td>
</tr>
<tr>
<td>Responsible for updating MSDS:</td>
<td>Manager: Environment &amp; SHEQ MS</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Emergency Tel No:</th>
<th>+27 (0)15 780 2666</th>
</tr>
</thead>
<tbody>
<tr>
<td>E-Mail Address:</td>

### 1. Product Identification

<table>
<thead>
<tr>
<th>Chemical Names and Synonyms:</th>
<th>UN Number:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAS Number:</td>
<td>NIOSH Number:</td>
</tr>
</tbody>
</table>

### 2. Composition

Contains (at varying concentrations) - Silver, Gold, Platinum, Palladium, Selenium and Tellurium

### 3. Hazardous Identification

<table>
<thead>
<tr>
<th>Route of exposure</th>
<th>Symptoms of overexposure</th>
<th>Health effects or risks from exposure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inhaled</td>
<td>Coughing</td>
<td>Excessive inhalation over long period may cause harmful irritation; use mask suitable for nuisance dust. Target Organ – None</td>
</tr>
<tr>
<td>Contact with skin or eyes</td>
<td>Possible eye irritation from dust particles; wear eye protection</td>
<td></td>
</tr>
<tr>
<td>Absorbed through skin</td>
<td>N/A</td>
<td></td>
</tr>
<tr>
<td>Swallowed</td>
<td>N/A</td>
<td></td>
</tr>
</tbody>
</table>

### 4. First Aid Measures

#### Inhalation:
Induce coughing

#### Skin Contact:
Flush with plenty of running water for 10 minutes.

#### Eye Contact:
See medical doctor if particles are still lodged in the eye

#### Ingestion:
Drink plenty of water. Contact a medical doctor

### 5. Fire Fighting Measures

Flammable: Anode Slimes is an inorganic, fully oxidized, non-flammable and non-combustible material.

### 6. Accidental Release Measures

Use - Area should be well ventilated. Prevent flakes from entering the eyes. Do not inhale dust.

Personal protective equipment (minimum required) - Use eye protection to prevent particles from entering eye. If dust levels are high - use a dust mask (FFP2).

Spill response procedures - (include employee protection measures) - Vacuum clean or sweep material, use dust masks suitable for nuisance dust (FFP2) and eye protection.

### 7. Handling and Storage

**Handling:**
Ventilation and engineering controls: maintain dust level below TLV.
Respiratory protection (type): masks suitable for nuisance dust (FFP2).
Eye protection (type): protective goggles or similar.

**Storage:**
Maintain good housekeeping to avoid transient dust.

### 8. Exposure Controls / Personal Protection
Ventilation System:
A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. If the exposure limit is exceeded, a half-face dust/mist respirator may be worn for up to ten times the exposure limit, for emergencies or instances where the exposure levels are not known, use a full-face piece positive-pressure, air-supplied respirator.

Eye Protection:
Use chemical safety goggles. Maintain eye wash fountain and quick-drench facilities in work area.

9. PHYSICAL AND CHEMICAL PROPERTIES
Lumpy brown/black powder, usually in a damp or wet form
Contains (at varying concentrations) - Silver, Gold, Platinum, Palladium, Selenium and Tellurium

10. STABILITY AND REACTIVITY
Anode slimes is stable.

11. TOXICOLOGICAL INFORMATION
Additional toxicology:
Solomonella typhirium mutagenicity: Not mutagenic at extract concentrations < 1,500g/l
From (Xenopus laevis) embryo teratogenicity: 48 h EC50: 125 mg/l, 48 h EC50: 645 mg/l

12. ECOLOGICAL INFORMATION
Ecotoxicity:
Daphnia pulex lethality: 48 h EC50: 0.78 mg/l, 48 h EC50: 2.7 mg/l
Algal (Selenastrum capricornutum) growth inhibition: 72 h EC50: 6.3 mg/l, 72 h EC50: 13 mg/l
Bacterial (Pseudomonas putida) growth inhibition: 6 h EC50: 781 mg/l, 6 h EC50: 29 g/l
Frog (Xenopus laevis) embryo lethality: 48 h EC50: 125 mg/l, 48 h EC50: 773 mg/l

13. DISPOSAL CONSIDERATIONS
Anode slimes containing waste is normally collected and recycled to recover the precious metal content. Should waste disposal be deemed necessary, follow local regulations.

14. TRANSPORT INFORMATION
This material is not hazardous (per 49 cfr 172.101) by the US department of transportation.
Proper shipping name: not applicable.
Hazard class number and description: not applicable.
UN identification number: not applicable.
Packing group: not applicable.
DAT label(s) required: not applicable.

15. REGULATORY INFORMATION
Anode slimes may be covered by the reporting conventions of some states.

16. OTHER INFORMATION

DISCLAIMER
